## "Flexible Packaging, Deserve Your Business"

Packzy is a leading manufacturer of high-quality packaging solutions, offering eye-catching designs across a wide range of products including packaging pouches, paper shopping bags, and various types of multi-layer films.

All Packzy products are manufactured in a modern, fully automated factory located in the Arasanj Industrial City, Qazvin Province.

By leveraging state-of-the-art machinery and using premium, eco-friendly raw materials, Packzy delivers outstanding and distinctive packaging products.

Our creative and professional team, with a deep understanding of the latest trends in the packaging industry, is committed to providing customers with innovative and high-quality designs.

With a central office in Tehran and sales representatives across the country, Packzy supports its clients through every step of the process-from consultation and concept development to graphic design and final production.

Packzy is proudly licensed by the Qazvin Province Food and Drug Administration, ensuring that all products meet the highest standards of health and safety.

## Packzy meets the diverse needs of markets by offering a wide range of services.

### Routine needs

Food and edible products

Health and beauty products

Books and magazines

Apparel and jewelry

Pet food

# Three-Side Seal Pouch

- **Three-side seal pouch is produced in two types: with zipper and without zipper (vacuum). This type of packaging is very lightweight and is ideal for products that do not require high volume or weight in a single package. It offers easy and convenient packaging and is one of the most widely used packaging types across all industries. This pouch can also be produced in very small sizes .**

## Transparent-metallized

- Suitable for packaging olives, pickles, nuts and dried fruits, automotive parts, flour, rice, dried and fresh herbs, and more
- Two or three layers
- Combination of polyethylene, transparent polyester, and metallized material
- Available in zippered and non-zippered types

- A stand-up pouch features both a zipper and a gusset, allowing it to stand completely upright when filled. This makes it ideal to show products on store shelves or for use as a final product container in home pantries. The zipper enables consumers to re-seal the pouch completely after each use, helping to preserve the quality of the remaining product. The gusset at the bottom of the pouch expands the internal space, allowing consumers to package a larger volume and weight of their product .

- Side gusset pouch, due to its gussets on the sides, is the bulkiest type of pouch. Once filled with product, it can stand upright on a surface in a box-like shape. This pouch does not have a zipper, so the consumer can adjust the pouch height according to the amount of product inside and seal the top using a heat-sealing machine. This pouch is suitable for products that are lightweight but have a high volume.

## Side Gusset Pouch

# Side Gusset Pouch

## Side Gusset Pouch

Width	Length	Quantity per Kg
16	24	90
24	34	45

## Fully Metallized

- Suitable for packaging dried tea, various powders, and herbal infusions
- Two or three layers
- Combination of polyethylene and metallized polyester
- Partial resistance to light penetration

# Bread and Sandwich Pouch

- This type of pouch is particularly suitable for bulky products that need to be packaged in a cylindrical or rectangular shape. Manufacturers of various types of bread and sandwiches are among the main users of this packaging style. When the product needs to be placed inside a cylindrical can or box after primary packaging, this pouch is an ideal and practical choice due to its high flexibility and formability.

# Kraft Shopping Bag

- The paper shopping bag is one of the simplest yet most effective packaging methods for presenting and delivering products to customers. Made from high-quality kraft paper, it is not only environmentally friendly but also has an elegant appearance. These bags are most commonly used in stores and retail settings, where customers place their purchased items inside and carry them to their final destination. Using this type of packaging adds a sense of trust and order to the shopping experience .

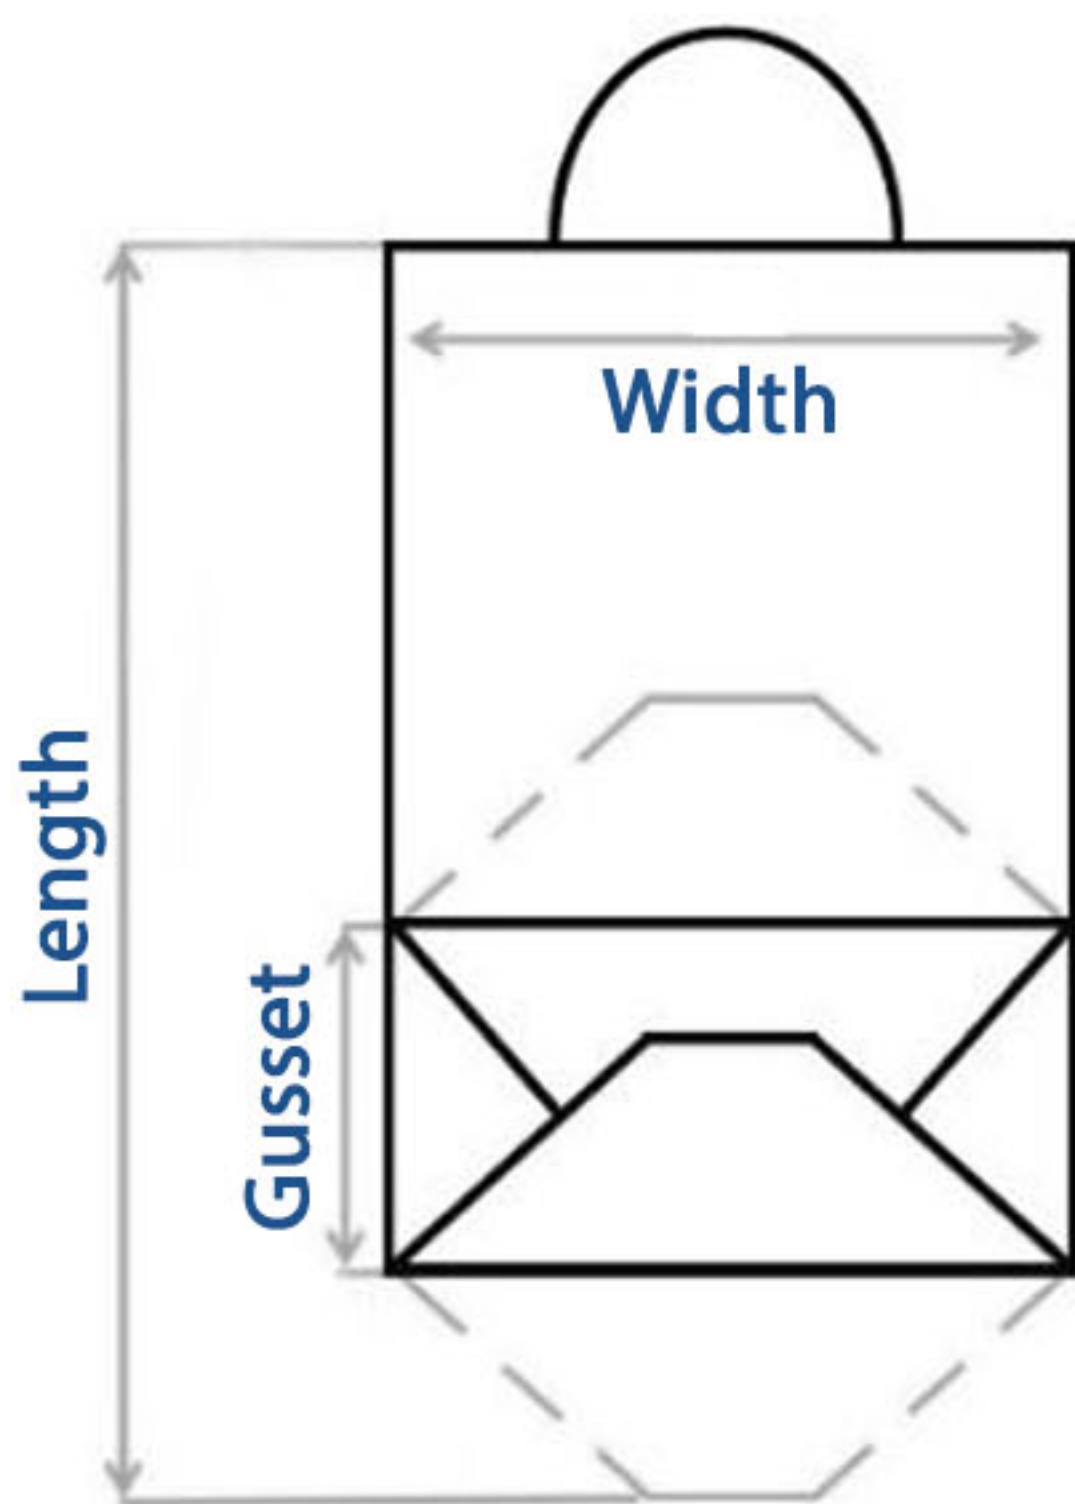

# Kraft Shopping Bag

## Kraft Shopping Bag

- Easier to carry and increased bag height with added string handles
- High-quality kraft paper
- Environmentally friendly
- Used in stores and retail shops
